

ELGIN & HALL[®]

BRITISH MADE

COMPLETE COLLECTION

HEATING HOMES FOR GENERATIONS

Welcome

An Elgin & Hall fireplace is a stylish, valuable addition to any home. Since 1964, we've proudly designed and crafted every piece in the UK. With over 60 years of innovation, our wide range of fires and fireplaces suits all interiors, guided by timeless principles of elegance and simplicity.

Our gas fires are built for performance and reliability, while micro marble surrounds reflect modern lifestyles

through advanced design and technology. Each marble piece is hand-finished with traditional craftsmanship.

Part of the BeModern® Group, we manufacture everything in-house—from fireplaces and stoves to our Atlanta bathroom range, made for both classic and contemporary homes.

Understanding a fireplace

Motion Sense Lights

Undermantle LED down lights offer a warm glow to your surround and fire. Turn on by the simple motion of your hand.

Shelf / Mantel

The top of the fireplace. The best place to display your ornaments.

Fire

The heart of the fireplace. Choose a Gas inset fire to finish your fireplace. Electric is also a great choice, visit pryzm.com or flare-collection.com for our inset electric fires.

Leg / Surround

The uprights of a fireplace. Gives height and decoration to a fireplace. Our Surrounds are precision machined and assembled making sure you receive perfection.

Back Panel

A flat surface that is located at the back of the fireplace and where the inset fire sits inside.

Hearth

The base part of the fireplace. The hearth sits on the floor and the rest of the fireplace sits on top.

Our Commitment

Highest Standards of Quality BeModern® furniture suppliers manufacture a world class product and continuous investment means we are recognised as the industry leader:

- Operating to ISO 9001:2015 accreditation
- Working closely with our supply partners to maintain the highest quality of raw materials.
- Investing in new technologies to provide innovative solutions.

Our CSR Policies

We are aware that global climate change threatens the wellbeing of the natural environment and society. Whilst governments around the world move to agree on cutting greenhouse emissions, as a British manufacturer BeModern® works to minimise our own carbon footprint, cut emissions, reduce waste, recycle and reap the benefits of new, green ways of running a manufacturing business.

Responsible Manufacturing

We are dedicated to minimising the environmental impacts of our manufacturing activities and seek to explore new ideas through eco innovation, for example our investment of over £1m in an eco-boiler to convert all waste timber into heat for our factories.

Our history so far **bemodern**®

Environmental Management

Having been accredited with ISO 14001:2015, the internationally recognised environmental management standard, BeModern® is committed to continually improving the effectiveness of our environmental management system.

Transport

BeModern® logistics department makes thousands of deliveries each year, providing us with an opportunity to reduce the carbon footprint through regularly modernising our fleet to minimise noise and air pollution and training drivers in fuel efficient and safe driving.

FSC® Certified Timber

BeModern® relies heavily on wood as a significant component in its wide range of products. With the ever-increasing demand for forestry products, the company takes a proactive stance in conservation. To fulfil its commitment to sustainable practices, BeModern® exclusively utilizes FSC® certified timber in the production of all its items.

Additionally, the company holds a complete Forest Stewardship Council® chain of custody certification, ensuring that its wood supply adheres to strict environmental standards throughout the supply chain.

Micro Marble Surrounds

WHAT IS MICRO MARBLE?

Micro marble is made of small pieces of real marble that has been crushed and compacted together and mixed with resin to ensure a smooth and even surface.

This is a beautiful material that we hand craft into a range of stylish and classic designs perfect for all tastes and homes.

Micro Marble Inglenook

The charm of micro marble is captivating in an Inglenook design; available in White, this surround can be beautifully paired with up to 5* optional back panels.

Choose from:

- White Marble
- Black Slate effect
- Chicago Concrete Herringbone
- Grey Slate effect
- Grey Herringbone

to create the perfect combination to compliment your interior whether contemporary or traditional.

Motion Sense under mantel lighting can be activated from a subtle hand movement across the surround to adorn the inglenook back panel with a warm glow.

Our micro marble inglenooks are suitable for electric stoves only; choose from our range of contemporary and traditional electric stoves and add a decorative flue for the look of a real woodburning stove.

Find your perfect electric stove at flare-collection.com

Inset Gas Fires

Once you've selected your new surround, you may choose to give it a warm glowing heart with an Elgin & Hall gas fire.

Our gas fires are controllable and convenient to operate with a discreet Smartslide control mounted on the top side or a manual control and igniter located behind the fret - flame height and heat output is at your control.

Installation

Current regulations stipulate that all gas fire installations must be carried out by a Registered Gas Safe Engineer.

For information and advice on a Gas Safe Engineer, please contact your local Elgin & Hall retailer.

Servicing

All gas fires need to be serviced annually by a Registered Gas Safe Engineer to ensure continued operation and optimum performance.

This annual service is a condition of our 5 year limited warranty, and you must show record of approved servicing.

Super Controllable

Smartslide Control

All gas fires are available with a Smartslide Control feature to turn the fire on and regulate its flame level. Mounted on the side of the fire, the control provides convenience of operation.

5 Year Warranty

We provide a 5 year Limited Warranty* so you can be confident you have purchased and installed a high quality product.

*Terms & conditions apply.

Safety Assurance

Flame Failure Device

All of our gas fires are fitted with a flame monitoring device ensuring that in the event of the flame going out during its operation, the gas supply to the fire is instantly cut off.

Oxygen Depletion Sensor

For your safety, all our gas fires are fitted with an Oxygen Depletion Sensor. This will shut off the gas supply if the oxygen level in the room is too low or if there is a blockage in the chimney or flue.

Quality Approved

All our fires are manufactured in accordance with internationally recognised Quality and Environmental Management System Standards ISO 9001:2015 and ISO 14001:2015 guaranteeing responsible working and product quality.

Calleos - Glass Fronted

A panel of ceramic glass prevents air from being sucked up through the front of the fire and directing heat up the chimney, meaning a higher percentage of convected and radiant heat is propelled back into the room.

Calleos 600

Inset Wall Mounted Gas Fire

The Calleos 600 gas fire, compatible with class 1, class 2 & balanced flues, introduces an exhilarating advancement in glass-fronted gas fire designs. With the option of a Slim or Wide* trim, this fire seamlessly integrates into the wall, creating a sleek and minimalist appearance. Now available as an LPG version, they both utilise cutting-edge under-log dual burner technology. Showcasing a captivating fuel bed arrangement, the reflective black glass internal panels will leave a lasting impression.
