GAZCO

Gas and Electric Stoves

MULTI AWARD WINNER

A **Warm** Welcome

Nothing creates an inviting atmosphere quite like a Gazco stove. The centrepiece of any home, it will add warmth and character to any room or living space – even if you don't have a chimney! Whether you want to achieve a minimalist, contemporary look, or have your heart set on a more traditional stove, this brochure will help you make the perfect choice, whatever your interior tastes.

From the highly efficient contemporary Gas Loft range with all its style and elegance, to the stunning cast iron detail on our traditional Chesterfield stoves, these innovative designs will appeal to any modern or traditional home.

There is also a range of highly realistic, electric log-effect stoves featuring Gazco's Chromalight® technology. These electric versions open up new possibilities such as conservatories, kitchens, dining rooms and bedrooms for you to have the warmth and character of a Gazco stove in your home.

GAZCO

Loft Gas with Steel Log Store.

We are proud to have been recognised as an award-winning manufacturer, for our high-quality products and innovative technology. **Find out more at gazco.com/awards**

The Gazco **Pedigree...**

Our gas and electric stoves are innovatively designed, solidly built and meticulously tested to ensure they continue to heat your home for many years to come.

Innovation in Design

With creativity and innovation at the heart of what we do, our expert design team continues to create unique, industry leading stoves that both inspire and endure. From the moment the first concept is sketched, through to the mapping of airflow using cutting-edge software, stove design is a science we have been perfecting since 1988.

We continually invest in our research and development facilities to ensure our team is at the forefront of fire design. Our pioneering concepts and technologies make our gas and electric models some of the most sought after stoves available.

Quality Construction

Built with the finest quality materials, each stove is engineered here in the UK. Cast iron and heavy gauge steel are used across our ranges to ensure each stove is built to the highest tolerances. Cast iron allows for the casting of intricate designs, making it perfect for traditional stoves. Heavy gauge steel is also an outstanding choice for stove construction, offering greater scope for design thanks to its versatile nature.

Rigorously Tested

Gazco is an ISO9001 and ISO14001 accredited company. Our rigorous quality control system ensures that all our appliances are safety checked and that they comply with the appropriate regulations, with all stoves in this brochure bearing both the UKCA and CE mark. Similarly, our environmental management systems ensure we work in a sustainable manner, whilst endeavouring to protect the environment by minimising any possible impact from our operations. We are recognised for our continued commitment to technical innovation, high quality products and excellent customer and after-sales care.

eco DESIGN COMPLIANT

40 YEARS

Expert Retailer Network

We take great care to ensure that our stoves are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home. These retailers will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Furthermore, Gazco fires and stoves purchased from within our Expert Retailer Network will have the additional benefit of a greatly extended warranty period, subject to terms and conditions. Full details can be found at www.gazco.com.

You can find and support your nearest retailer by visiting: www.gazco.com/retailers

Warranty

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas or electric stove. The warranty for gas stoves can be extended to a period of five years by registering your stove with Gazco. Please note, these warranties exclude certain consumable parts. Stoves purchased outside of Gazco's Expert Retailer Network will carry a standard One Year non-extendable Warranty or the minimum statutory warranty for your country. Full warranty terms and conditions are available to view at www.gazco.com.

Loft | Gas Stove Range

Clear-cut lines and sleek surfaces ensure the Loft's pure design creates a striking focal point in your interior. Reflective black glass frames the stove's tall firebox, subtly contrasting with the matt steel body. Soaring flames dance amongst a highly realistic fuel bed, composed of hand painted logs which are mirrored on all sides by the EchoFlame™ Black glass lining.

Loft with Steel Plinth

Luxurious Styling Possibilities

Loft stoves can be styled with a variety of accessories. Choose from cleanly styled Plinth and Logstore bases, with either option offered in matching steel, as well as smart Castillo grey sandstone or luxurious Woodgrain sandstone.

There is also a wall mounted version, for an ultra-modern floating installation that lends itself perfectly to contemporary settings. Regardless of the mounting options selected, the stove's height can be accentuated with a striking matching steel top section, hiding the flue pipe and continuing the stove's clean lines.

Balanced Flue Gas Stove Systems

The Gazco Balanced Flue system means no chimney is not a problem if you opt for a balanced flue gas stove, as it draws combustion air from outside through its concentric pipe systems. A full range of optional flue components is available to suit configurations shown on page 78.

Gazco have specifically developed a range of flue system components to complement your balanced flue stove. Crafted from 304 grade stainless steel and aluminium with some items additionally offered in anthracite and matt ivory paint finishes. Designed with ease of installation and flexibility in mind, these flue systems simply push together without the requirement for locking bands or screws. Both the inner and outer pipes are secured with easy fit, self locking, high temperature silicone seals. For further information, please speak to your retailer or visit www.gazco.com.

The above information is to assist in your choice of a suitable Gazco stove. This is not intended to be all the information required to install your stove. This can be obtained from your local Gazco retailer or you can download the full installation instructions from the Gazco website at www.gazco.com.

Your Home and Flue Requirements

When selecting your stove, your local Gazco retailer will need to make sure it's suitable for your home. Firstly, you need to know what fuel type you will be using. Secondly, you will need to be aware of what type of chimney or flue you have. If you do not have a chimney then don't worry, Gazco have models developed to suit your home too!

Conventional Flue - Gas

Conventional flue systems are easily recognisable as either a conventional brick or stone chimney or pre-fabricated chimney system. Should your home have none of these at present, it is usually possible to have a pre-fabricated system installed if required.

Brick or Stone Chimney (Class 1)

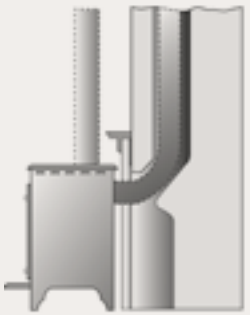
The chimney stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

Pre-Fabricated Flues (Class 1 & 2)

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

Rigid or Flexible Metal Flue Systems

With this flue system rigid metal tubes, or a combination of rigid and flexible metal tubes, extend vertically directly from the stove to the outside of the property. This may be either straight through the ceiling or roof with the flue pipe exposed, or by using the channel of a chimney or a studwork enclosure. The products of combustion are carried up the flue by natural convection.

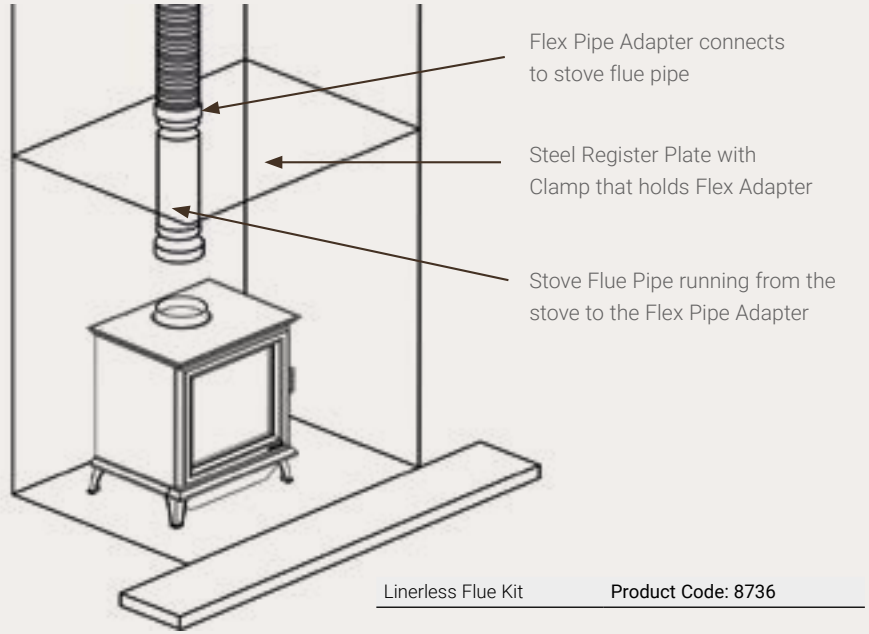


Optional Linerless Flue Kit

A selection of Gazco conventional flue gas stoves are compatible with our optional linerless flue kit. At just 0.5 metres long, this short piece of flexible, stainless steel flue pipe and debris deflector has been specifically designed to be slotted into your masonry chimney. This eliminates the need for the chimney to be fully lined and any associated labour, facilitating a simpler and more cost effective solution.

The Optional Linerless Flue Kit is compatible with:

- Chesterfield 5 Gas
- Sheraton 5 Gas
- Vogue Midi Gas Range
- Vogue Midi T Gas Range
- Loft Range



Linerless Flue Kit **Product Code: 8736**

Balanced Flue - Gas

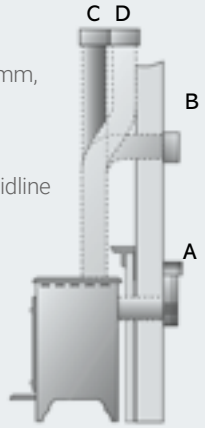
Balanced flues models are completely sealed from the room into which they are installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall.

Balanced Flue
(No chimney required)

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Depending on the stove selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. Gazco offers a comprehensive range of balanced flue system components.

Balanced Flue System Options

A - Rear outlet (max 600mm wall thickness).
B - Top outlet/up and out (min rise 500mm, max 3m), horizontal (min 250mm, max 5m). An additional bend can be incorporated in to the horizontal section of the 'up and out', dependent upon a 1m min vertical rise.
C - Top outlet/vertical (min 3m, max 10m). Vogue Midi T / Vogue Midi T Midline (Min 2m, Max 10m)
D - Top outlet/vertical with offset (min to first bend 500mm, max flue length 10m).



Ask your retailer for full technical details or see our Balanced Flue System brochure at www.gazco.com.

Electric Stoves
(No chimney required)

Our range of electric stoves incorporates our Chromalight Immersive LED technology and do not have any chimney or flue requirements. From the contemporary collection of Vision to the more traditional Sheraton models, these electric fires can be enjoyed with or without the heat and operated using a remote control, so you can enjoy the warmth and ambience from the comfort of your favourite chair!

No Air Vent Required (UK)

All stoves shown with this symbol, boast the advantage of not normally requiring an air vent* where the air permeability is greater than 5.0m3/hr/m2. Please discuss this in full with your local Gazco retailer.

**Requirements in the Republic of Ireland are different.*

Loft with Woodgrain Sandstone Log Store

Remote Controls

Gas Stoves

Gazco was the first UK company to introduce remote controls for gas fires. Today, our remote control systems for our gas stoves feature advanced technologies and offer the ultimate in convenience.

Standard upgradeable remote control

Once the pilot light has been ignited manually you can vary the flame height and heat output from the comfort of your armchair.
(Upgradeable option for Marlborough2, Stockton, Huntingdon, Vogue and Vision gas stoves)

Programmable Thermostatic upgradeable remote control

This deluxe version has two additional features. The first allows you to thermostatically control the room temperature whilst the second allows you to programme your stove to switch itself on and off twice a day.
(Upgradeable option for Marlborough2, Stockton, Huntingdon, Vogue and Vision gas stoves)

Programmable Thermostatic remote control *(Supplied with Loft & Studio Freestanding)*

This advanced remote is loaded with exciting features that make it possible to programme your stove to perfectly complement your lifestyle. Not only can you ignite, extinguish and thermostatically control your stove, this remote control system benefits from advanced technology that gives you the option to create an automatic, intelligent heating program that means your home is comfortable and cosy at any time of the day or night.

Fully-sequential thermostatic remote control *(Supplied with Gas Chesterfield 5 and Sheraton 5)*

Gazco's fully-sequential thermostatic control system allows you to ignite your stove in seconds as well as adjust flame height from the comfort of your sofa. You can also set your stove to be controlled thermostatically to maintain your preferred room temperature.

Electric Stoves

Our range of Electric Stoves are as easy to install as plugging in and switching on! They are available in a range of designs from traditional to modern, to suit all homes and tastes.

The Gazco Programmable Thermostatic Eco Handset

All Gazco Electric stoves features Gazco's Eco remote control, which provides complete control over the stove's Chromalight flame colours and lighting effects, as well as heating and energy saving features. Ambient heating control allows you to set the optimum temperature for your room between 15°C and 25°C, with the stove automatically managing heating power to reach the chosen temperature as efficiently as possible. Daily and weekly heating lets you program your stove to suit your lifestyle and can be easily advanced or delayed without disrupting scheduling.

Energy saving features such as Open Window Detection save energy by turning off the heat if a sudden drop in room temperature of 4°C or more is detected, for example when a door or window is opened. Heating can be easily resumed by pressing the heat button again or closing the window.

Vogue Midi Electric with Crystal-Ice fuel effect on Blue flame setting

Additional Information

Product Improvement & Brochure Photography

Gazco pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations and amendments. Exact product details should be discussed with your retailer at the time of purchase.

All fire and flame photography has been taken from genuine products; however, the exact appearance of the flame picture for any appliance will vary depending on the nature of the flue type, installation surroundings, local geographical features and the way in which the appliance is operated. Owing to variations in studio lighting and printing inks, the colours of stoves illustrated in this brochure may differ slightly from actual models.

Given that building regulations are subject to constant change, some of the photography in this brochure may not comply with the requirements of the latest Building Regulations and you should always check your proposed installation arrangement with your qualified gas installer before proceeding. Certain settings in this brochure are dependent on the use of heat shields to reduce the required separation from combustible material.

Please note: The operation and appearance of gas appliances depends on variable factors such as the gas pressure supplied.

Installation and Safety

Gazco gas stoves must be fitted by a qualified gas installer (Gas Safe registered in the United Kingdom or Bord Gais registered in the Republic of Ireland) who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions for many models can be obtained prior to purchase by downloading them from www.gazco.com.

Please note that all parts of these stoves become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

Technical Specifications

All specifications given in the main part of this brochure are approximate. Actual specifications for each individual product will vary according to the exact model and are given on pages 84 - 96. Your Gazco retailer will be pleased to help explain specific model specifications and provide any further information you may require, or you can view/download specification sheets from www.gazco.com.

Servicing and Support

STOVAX GAZCO SERVICE & SUPPORT ENGINEER TEAM

To keep your gas stove looking and performing at it's best, it must be serviced annually. This service must be undertaken by a GasSafe (Great Britain), CORGI (Northern Ireland) or Bord Gàis (Republic of Ireland) approved engineer and your retailer can organise this for you. Alternatively, Gazco offer a manufacturer's premium service with our friendly team of qualified engineers which can be booked at www.gazco.com/support.

Warranty information

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas or electric stove. The warranty for gas stoves can be extended to a period of Five years by registering your stove with Gazco. Please note, these warranties exclude certain consumable parts. Stoves purchased outside of Gazco's Expert Retailer Network will carry a standard One Year non-extendable Warranty or the minimum statutory warranty for your country. Full warranty terms and conditions are available to view at www.gazco.com.

Technical Information

The below information is to assist in your choice of a suitable Gazco stove. This is not intended to be all the information required to install your stove. This can be obtained from your local Gazco retailer or you can download the full installation instructions at www.gazco.com

Chesterfield 5 Gas and Electric

Dimensions (mm)

	A	B	B1	C	D	E	F	G	H	J	K	L	M	Weight

Also Available from the Stovax Heating Group

Stovax Wood & Multi-fuel Stoves

Stovax, our solid fuel division, offer a huge range of beautiful stoves that burn wood and other solid fuels. Designed and engineered here in the UK, these appliances offer a natural and practical home heating solution.

Choose from a stunning range of modern and traditional styles in various sizes and heat outputs to suit your home. For more details speak with your local retailer or visit www.stovax.com.

Stovax Sheraton 5 woodburning stove shown with Cavendish Bolection Limestone mantel

Gazco eReflex 150RW with Oak Log effect, shown as a three-sided installation. Shown with optional Mood Lighting System.

Gazco Gas & Electric Fires

In addition to the wide selection of stoves shown in this brochure, Gazco also offers a number of gas and electric fires, which are covered in a separate dedicated brochures. Whether you want to achieve a contemporary look or traditional interior, Gazco has the perfect solution whatever your style or budget.

Ask your local retailer for more information or download the brochure from www.gazco.com.

Gazco Reflex 75T 3-Sided Gas fire

onyx

Luxury Fires and Stoves

In addition to the Gazco brand, the Stovax Heating Group is proud to offer a new and growing premium collection of fires and stoves from luxury brand, Onyx.

This showroom exclusive brand is available from a carefully selected group of Approved Onyx Retailers, and includes the Onyx Liv 3 gas stove. Offering a fully integrated control system, 180° views, and ultra-realistic flames, the Liv 3's elegant, curved design makes for the ultimate contemporary centrepiece to add poise and allure in the home.

To find out more about the Onyx brand and experience, visit www.onyxfires.com.
