DUAL ENERGY PACKS

Do you still want to warm your towels even when the central heating is turned off?

You can add one of these great dual energy packs to your radiator to allow you to control it electrically when the central heating is off.

THE DEPACK IS BARELY VISIBLE WHEN FITTED

All Redroom radiators have the CE mark, having been independently tested in accredited laboratories to EN442 in accordance with CE requirements. This means our published heat output figures are fully in line with the testing criteria. You can therefore specify the size of your radiator with the assurance that your choice will perform as stated, making Redroom radiators the obvious choice.

HOW TO SPECIFY YOUR RADIATOR

STEP 1

STEP 2

STEP 3

SECONDARY HEAT SOURCE

HOW?

1. Turn off connection to central heating, so the water within the radiator is isolated
2. Switch on Depack, so your radiator will be heated electrically
3. Enjoy warm towels all year long even when the central heating is off

To start with, you need to find out the heat requirement of the room in Watts. To calculate this as a rough guide, allow 50 watts per cubic metre of the room. You should also consult with a heating engineer for the exact requirement. To change the watts into BTUs, multiply the watt amount by 3.412.

Choose the location of the radiator and figure out any restrictions that could occur, for example height if the radiator is going to be fitted under a window.

Browse through this catalogue and choose the perfect radiator for your dream bathroom. For more information speak to your local retailer or heating engineer.

Does your radiator meet the room's heat requirement?

Depending on the size of your bathroom and type of radiator you want, you may need a secondary heat source.

If necessary you can add an extra radiator or underfloor heating to make sure your room is sufficiently heated.

UNDERFLOOR HEATING

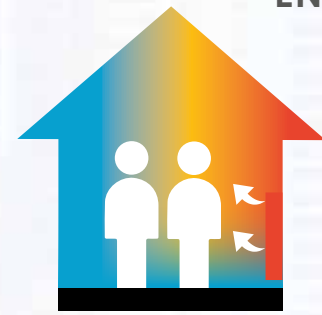

Add luxurious comfort to your home with Redroom underfloor heating. Perfect for heating all areas of your house, but particularly suited to kitchens and bathrooms.

All mats are installed with a choice of three stylish digital thermostats that have energy saving functions to help reduce heating costs.

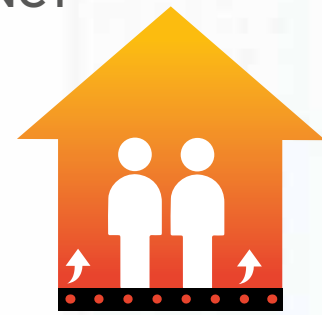

Available in a range of sizes, the self-adhesive mesh can easily and quickly be fitted directly onto concrete or insulation boards to provide an even spread of heat.

ENERGY EFFICIENCY

Radiators generate warmth around and above the radiator

Underfloor heating provides the ultimate comfort with heat rising up from the floor where you need it the most

UNDERFLOOR HEATING CABLE & MEMBRANE

EACH UNDERFLOOR HEATING INSTALLATION REQUIRES A THERMOSTAT CONTROLLER

Turn to page 54 to choose yours

FEATURES AND BENEFITS

- Quick and easy to install and use
- Cost effective
- Space saver - When used as a primary heat source you don't need radiators, freeing up precious wall space
- Ideal for tiled floors. Also suitable for laminate and wood floors
- Designed to secure heating cable as well as act as a decoupling membrane
- Neutralises tensions between substrate and tiles, reducing cracking as the floor settles/moves
- Fully customisable
- Fit with flexible tile adhesive (not provided) and no levelling compound required

AS EASY AS 1,2,3

Combining underfloor heating and antifracture mat, this brilliant new product from Redroom could save you significant money and time in fitting. It really is as easy as 1,2,3.

STEP 1

Redroom decoupling membrane goes down on the floor.

STEP 2

Underfloor heating wire is spaced out within the guides on the membrane.

STEP 3

It's now ready for tiling. The membrane gives ultimate protection against tiles cracking that may occur due to settling and movement of the substrate underneath.

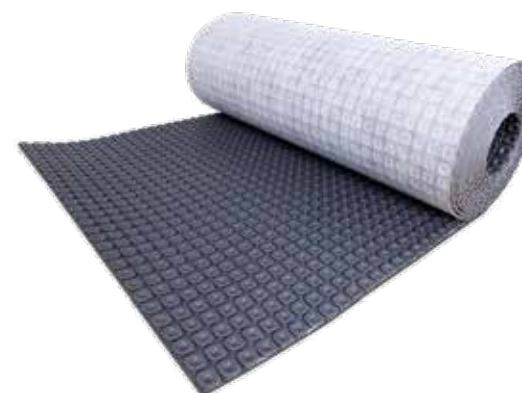

Time saving is a key benefit with this product, but what's more, the membrane offers a high level of protection against accidental damage plus it gives the installer a template for very accurate and consistent spacing. If you use underfloor heating, this is the product you need in your life.

DECOUPLING MEMBRANE ROLLS

Code	Description	Price
UFMEM1	5m ² Membrane Roll	£152.29
UFMEM2	15m ² Membrane Roll	£456.86

Polypropylene membrane with rounded square shaped studs that form channels specifically designed to embed and fasten electric heating cables. Suitable to go directly onto a concrete subfloor or timber covering insulating boards.
